

Paylocity Clean Timesheet

A Chrome/Brave extension that replaces Paylocity's timesheet UI with a fast, keyboard-navigable grid and a configurable daily reminder.

What it does

- Replaces the Paylocity timesheet with a clean spreadsheet-style grid
- Daily alarm notification at a time you choose (weekdays only)
- "Log today's hours" quick-entry modal from the notification or extension popup
- Saves your job codes locally — favorites show in the grid, others are one click away
- Keyboard navigation (arrow keys) and Escape to close
- Autofill: fill an entire week with one click

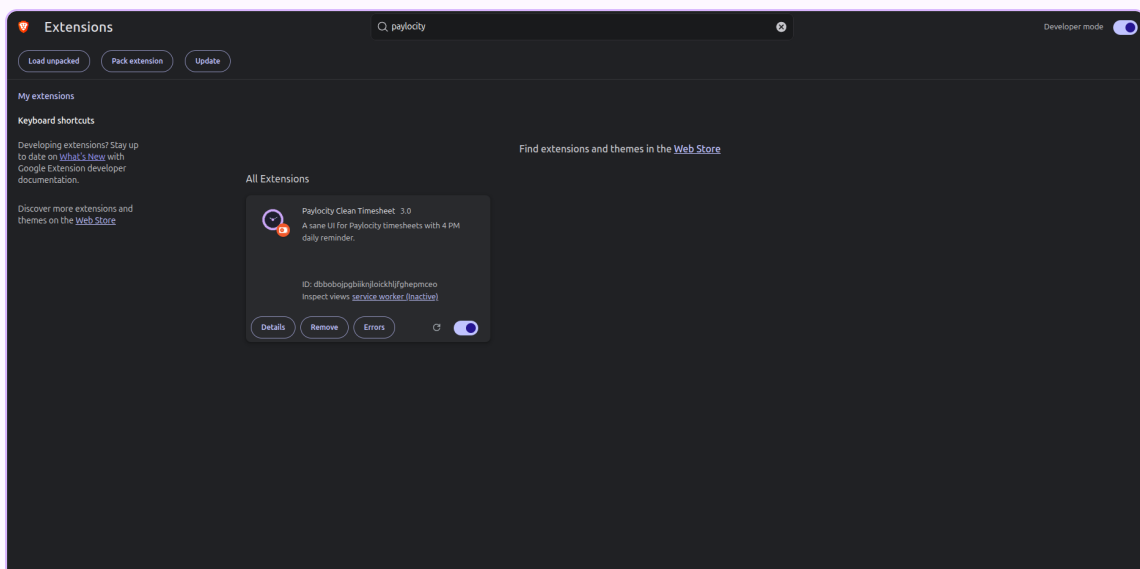

Installation (Chrome Extension)

Step 1 — Download the extension

Step 2 — Open Chrome Extensions

In Chrome, go to `chrome://extensions` or `brave://extensions` or open the menu → **More tools** → **Extensions**.

Chrome Extensions page (`chrome://extensions`)

Step 3 — Enable Developer Mode

Toggle **Developer mode** on (top-right corner of the Extensions page).

Step 4 — Load the extension

Click **Load unpacked** and select the `paylocity-extension/` folder.

Step 5 — Confirm it loaded

You should see **Paylocity Clean Timesheet** appear in your extension list with a clock icon. Pin it to your toolbar for easy access.

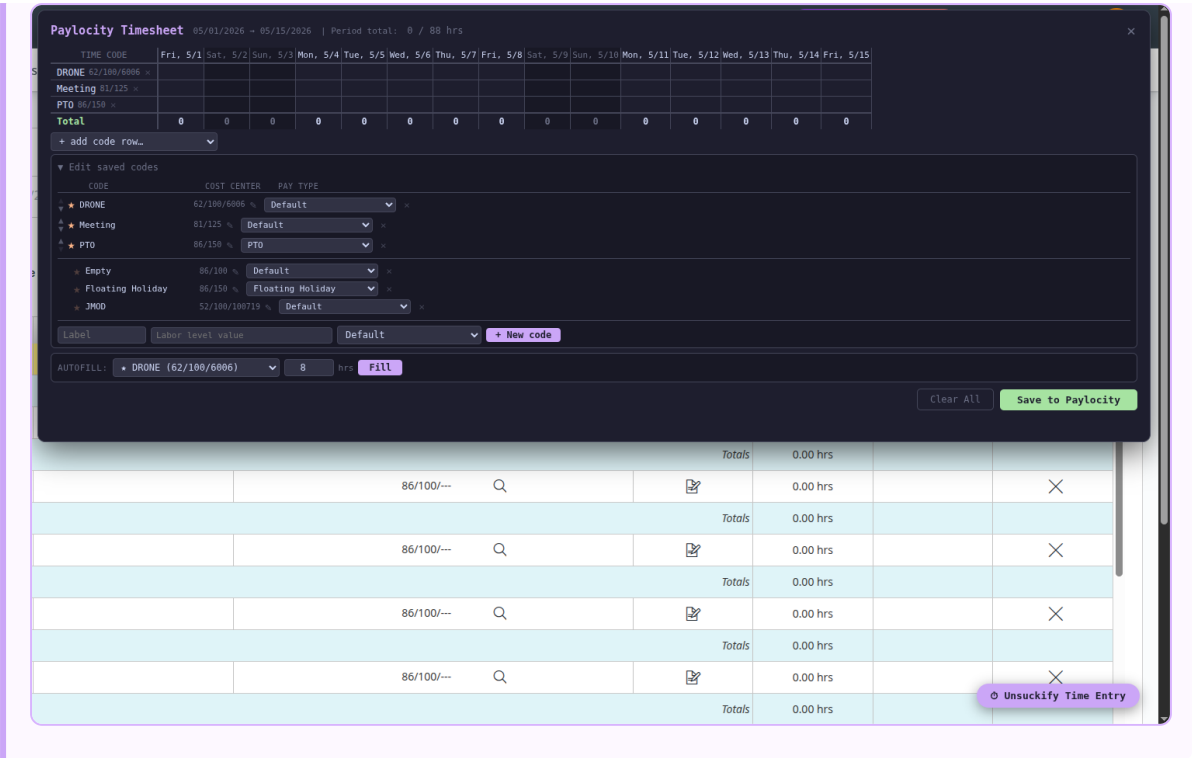

Setting up your job codes

Job codes are the labor level values Paylocity uses to categorize your hours. You need to find your own values

Adding codes via the UI

1. Navigate to your Paylocity timesheet.
2. Click ⌚ **Unsuckify Time Entry** (bottom-right of the page).
3. Expand **Edit saved codes** → scroll to the bottom → fill in **Label** and **Value** → click **+ New code**.
4. Star (★) the codes you use most — starred codes appear as rows in the main grid.

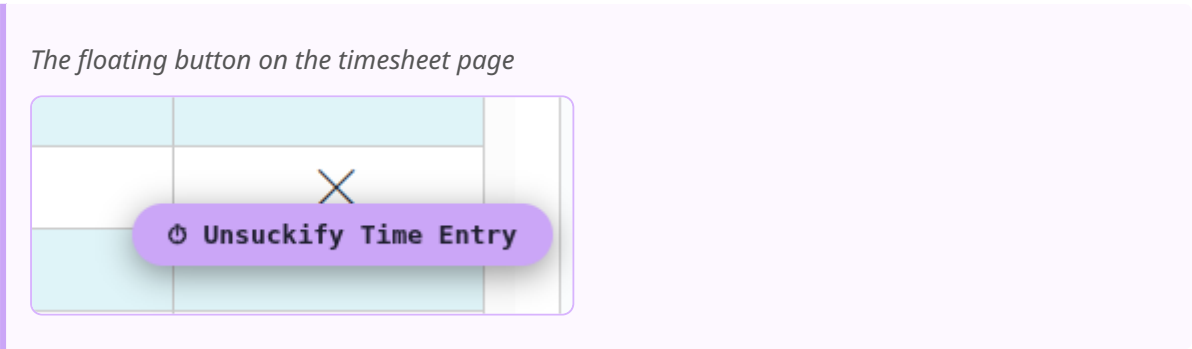

"Edit saved codes" panel open with the new code form filled in

Daily usage

Opening the timesheet panel

Click  **Unsuckify Time Entry** in the bottom-right corner of any Paylocity timesheet page.

The grid

Column	What it shows
Time Code	Your favorited job codes (label + cost center)
Mon–Fri columns	Editable hour inputs
Total row	Per-day totals, color-coded (green ≥ 8 h, orange < 8 h)

Column	What it shows
Period total	Sum vs. target for the pay period

- Type hours directly into any cell
- Use **arrow keys** to move between cells
- Press **Escape** to close the panel
- Click **Clear All** to zero every cell
- Click **Save to Paylocity** to submit

Paylocity Timesheet 05/01/2026 - 05/15/2026 | Period total: 87 / 88 hrs

TIME CODE	Fri, 5/1	Sat, 5/2	Sun, 5/3	Mon, 5/4	Tue, 5/5	Wed, 5/6	Thu, 5/7	Fri, 5/8	Sat, 5/9	Sun, 5/10	Mon, 5/11	Tue, 5/12	Wed, 5/13	Thu, 5/14	Fri, 5/15
DRONE 62/100/6006	6			2	9	4	3	8			8	8	8	8	8
Meeting 81/115	1			6		4	4								
PTO 86/158															
Total	7	0	0	8	9	8	7	8	0	0	8	8	8	8	8

+ add code row...

Edit saved codes

AUTOFILL: DRONE (62/100/6006) 8 hrs **Fill**

Clear All Save to Paylocity

Autofill

Select a job code and an hour value, then click **Fill** to populate all empty weekday cells for that code at once.

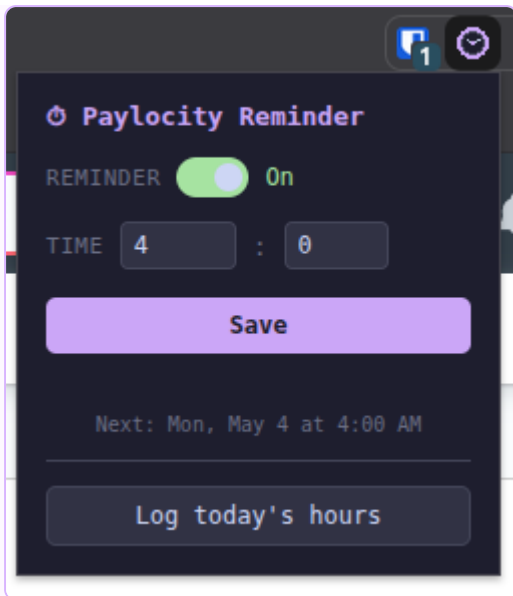

Adding a code row for one-off entries

Use the **+ add code row...** dropdown above the grid to add a non-favorite code as a temporary row for the current session.

Reminder setup

Click the extension icon in your Chrome toolbar to open the popup.

Extension popup showing toggle, time inputs, Save button, and "Log today's hours" button

Control	What it does
Reminder toggle	Turn the daily alarm on or off
Time inputs	Hour (0–23) and minute (0–59) in 24-hour format
Save	Saves settings and reschedules the alarm
Next:	Shows the next scheduled alarm time
Log today's hours	Opens Paylocity directly to the quick-entry modal

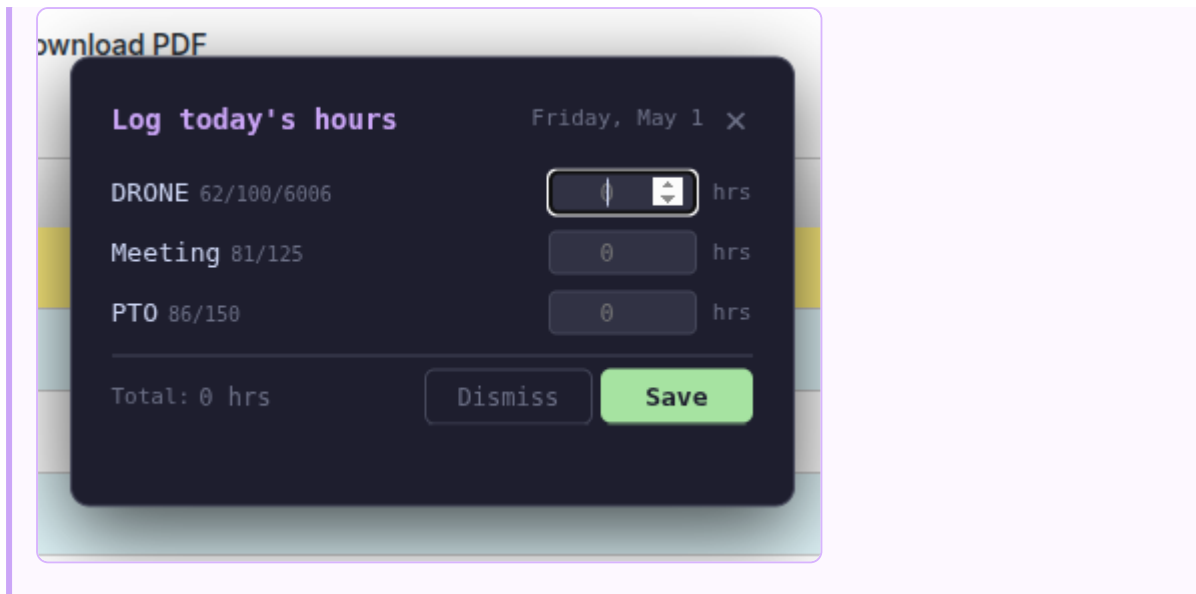

When the alarm fires

A Chrome notification appears at the configured time on weekdays. Click it (or click **Log today's hours** in the popup) to open the quick-entry modal.

Quick-entry modal

Enter today's hours per job code and click **Save**. The modal submits directly to Paylocity and reloads the page.

Screenshot placeholder: Quick-entry modal

Troubleshooting

"Timesheet still not loaded" alert The extension polls for timesheet data for up to 15 seconds after page load. If you see this, try reloading the page and clicking the button again.

Hours saved but wrong codes appear after reload Your labor level values may be slightly wrong. Use DevTools (see above) to verify the exact string Paylocity expects.

Reminder fires but Paylocity logs me out This is normal — Paylocity's session expires. After you log back in, the extension detects you're not on the timesheet and redirects you there automatically, then shows the quick-entry modal.

Changes to saved codes aren't reflected in the grid Close and reopen the panel (click the button twice) to rebuild the grid with updated code data.
